ILLUSTRATED CATALOGUES SENT ON APPLICATION.

Draper Company Products.

Our Latest Northrop Loom.

WE begin to feel quite independent in our loom trade, as the results of experience have proved that our position is absolutely unassailable. A few facts speak for themselves :

60,000 looms sold or changed over to date.

Weavers earning more money at one-half former price per cut.
Good weavers running 24 to 32 print looms and 20-3 harness looms.

Gingham weavers running 6 looms with warp-stop motion.

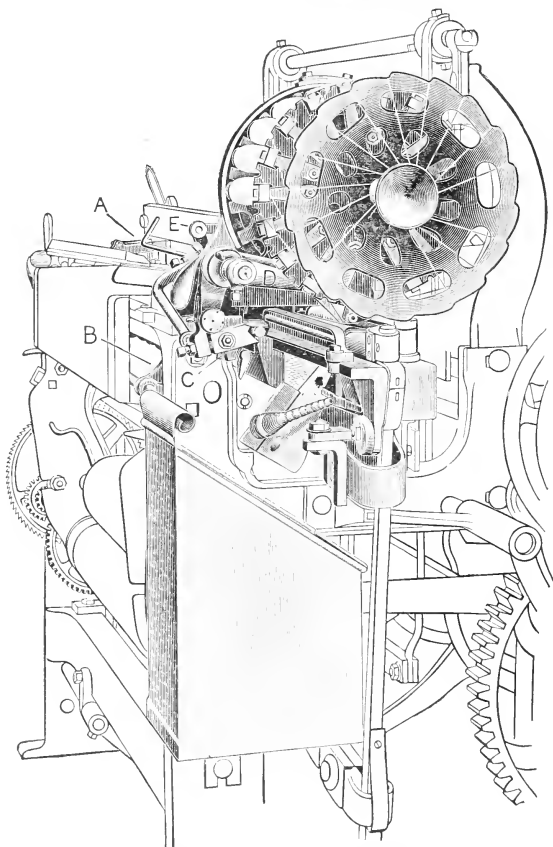

In one large print mill the **AVERAGE** number of looms per weaver is eighteen.

We are employing more hands than ever worked before in an American Cotton Machine Shop and are enlarging our plant in every direction.

Separate corporations building these looms in Canada, Germany, France and Switzerland.

You can feel assured that merit is recognized when the copyist appears—but you don't want a copy.

Draper Company Products.

DETAIL OF HOPPER MECHANISM.

We used to claim that weavers could attend Northrop Looms in the proportion of two to one common. The users are finding this prediction far too moderate as they often run three to four times their former limit.

In several mills weavers are paid **less** than one-half the former price for weaving cloth per cut, and yet make **higher** wages than when running common looms. A mill that cannot appreciate that statement simply cannot appreciate the tale told by concrete figures. Those who attempt to sell cloth handicapped by an extra cost of from one cent per pound upward, can cling to their obsolete common looms while their more enterprising neighbors glean the profits.

Draper Company Products.

• • • • •

We have by no means stopped manufacturing other Cotton Machinery simply because our loom has become such an important factor in our business. We not only continue to make and sell

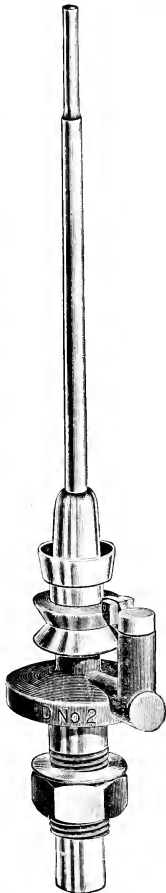

Twisters,
 Warpers,
 Spoolers,
 Reels,
 Balling Machines,
 Spindles,
 Temples,
 Separators,
 Spinning Rings,
 Etc., Etc.

But we continue to improve them. We have modified the detail of that most excellent spindle—**The Draper No. 2**—until after repeated tests and trials we find nothing seemingly capable of further improvement for present use.

Our rings are now made by improved process, and are better than ever.

We have recent improvements in Warpers of great importance.

We shall endeavor to keep the trade duly informed of new features by circulars.

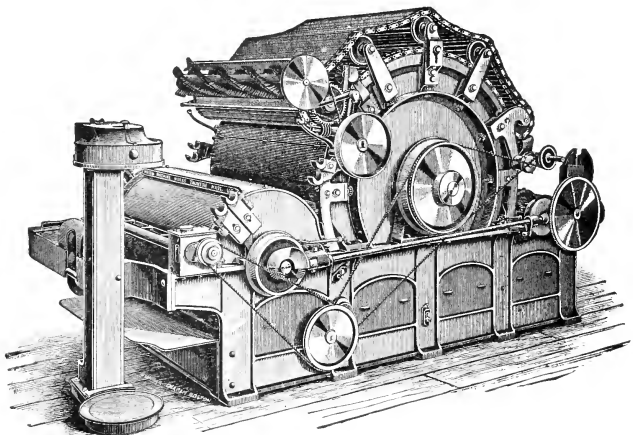

Draper No. 2 Spindle.

ESTIMATES FURNISHED.

Kilburn, Lincoln & Co.,

FALL RIVER, MASS.

LOOMS

For Cotton and Silk Weaving.

ALSO SHAFTING, PULLEYS AND HANGERS.

The Kilburn, Lincoln & Co. High-Speed Loom.

THERE are over 30,000 "High-Speed Looms" manufactured by Kilburn, Lincoln & Co. in successful operation in the city of Fall River alone, and many thousands more in other parts of New England and the South.

The light-running qualities of this loom and the consequent great saving in power, commend it to manufacturers. On account of the light running feature, combined with strength, our loom is especially adapted to be run at High Speed. At the Seaconnet Mills, Fall River, 928 of these looms were in operation for a number of years at 204 picks per minute, turning out, in 301 days of 10 hours each, 14,329,219 yards 64x64 goods, a daily average of 51 3-10 yards per loom.

Of the other Fall River mills using our looms may be mentioned the King Philip, where 2,800 are in operation on the finest grades of cotton cloth. The Hargraves and Parker Mills, also, are fitted with our "New High-Speed Loom," manufacturing fancy goods, some of which are the finest produced in the country. The new Arkwright Mill is operating 1,100 of our HEAVY PATTERN Looms.

We claim that the mills producing the largest quantities of goods per day, as well as those producing the finest quality of goods, are running our looms.

*We are prepared to build our
High-Speed Looms with the North-
rop continuous filling and warp-
stop motions attached.*

THE FISHER CARD FEED

FOR WOOL, SHODDY AND COTTON, IS

FIVE YEARS on the market. It holds more stock, requires less space, and needs no "attachments." It is simple in construction, is strongly built, turns out even work, requires little changing, and feeds the same whether full or nearly empty.

It is built in all sizes and guaranteed as represented.

It has received the strongest possible endorsement from manufacturers who have been using it and placed second orders. Investigate this feed. It will pay you.

-----MANUFACTURERS OF-----

COTTON MACHINERY.

Indian Orchard Co., Indian Orchard, Mass.

John J. Kay, 132 Allen St., Phila., Pa.
Newburger Cotton Co., Grenada, Miss.
(See ad. p. 354.)

Reis & Co., 629 Atlantic Ave., Boston.
(See ad. p. 346.)

Stoddard, Haserick Richards Co. (See ad. p. 11.)

Street, R. R. & Co., 184, 186 Washington St., Chicago, Ill. (See ad. p. 30.)

Wolf, W., & Sons, 620 Atlantic Ave., Boston, Mass. (See ad. p. 346.)

Cotton Machinery.

Atherton, A. T., Machine Co., Pawtucket, R. I. (See ad. p. 48.)

Altman, W. W. & Son, 2816 No. 4th St., Phila., Pa.

Ashworth, Elijah, Fall River, Mass.

Crompton & Knowles Loom Works, Worcester, Mass. (See ad. p. 44.)

Curtis & Marble Machine Co., Worcester, Mass. (See ad. p. 18.)

Draper Company, Hopedale, Mass. (See ad. pp. 3, 4, 5.)

Easton & Burnham Machine Co., Pawtucket, R. I.

Fairmount Machine Co., 22d and Wood Sts., Phila., Pa.

Howard & Bullough American Machine Co., Pawtucket, R. I. (See ad. p. 9.)

Kilburn, Lincoln & Co., Fall River, Mass. (See ad. p. 10.)

Leigh, Evan A., 35 Mason Building, Boston. (See ad. p. 18.)

Lowell Machine Shop, Lowell, Mass. (See ad. p. 2.)

Mason Machine Works, Taunton, Mass. (See ad. pp. 6, 7.)

McKerrow, H. G., & Co., 31 State St., Boston.

Phila. Drying Machinery Co., 6721 Germantown Ave., Philadelphia, Pa.
(See ad. p. 14.)

Philadelphia Textile Machinery Co., Hancock and Somerset Sts., Philadelphia, Pa. (See ad. p. 15.)

Phillips, Thomas Co., Providence, R. I.

Riley, C. E. & Co., 281 Congress St., Boston, Mass. (See ad. p. 8.)

Sargent's, C. G. Sons, Graniteville, Mass. (See ad. p. 14.)

Stoddard, Haserick, Richards & Co., Boston, Mass. (See ad. p. 11.)

Whitin Machine Works, Whitinsville, R. I. (See ad. p. 11.)

Woonsocket Machine & Press Co., Woonsocket, R. I. (See ad. p. 11.)

Cotton Openers and Lappers.

Atherton, A. T., Machine Co., Pawtucket, R. I. (See ad. p. 48.)

Howard & Bullough American Machine Co., Pawtucket, R. I. (See ad. p. 9.)

Leigh, Evan Arthur, 35-36 Mason Bldg., Boston, Mass. (See ad. p. 18.)

Philadelphia Textile Machinery Co., Hancock and Somerset Sts., Philadelphia, Pa. (See ad. p. 15.)

Cotton Softeners.

Hollbrook Mfg. Co., 496 Washington St., New York. (See ad. p. 282.)

Cotton Waste.

See Waste.

Cotton Yarns.

See Yarns, Threads, etc.

Crochet Machine Needles.

Morrow Machine Co., Hartford, Conn.

Crochet Machines.

Morrow Machine Co., Hartford, Conn.

Cutters for Knit Fabrics.

Kennedy, Thos. (Cutters, etc.), Cohoes, N. Y.

Cylinder Oils.

Nye, W. F., New Bedford, Mass. (See ad. p. 31.)

Cylinders, Tin, for Frames and Mules.

Getchell, S. S. & Son, Woonsocket, R. I. (See ad. p. 18.)

Designers.

Freund, Eugene F., 141 Maiden Lane, New York.

Drawers.

Beckley, A. J. Co., Garwood, N. J. (See ad. p. 28.)

Harrington & King Perforating Co., 239 North Union St., Chicago, Ill.

Phillips, Thos. Co.

Drawing Rolls.

Metallic Drawing Roll Co., Indian Orchard, Mass. (See ad. p. 17.)

Driers.

Birch Bros., Somerville, Mass. (See ad. p. 18.)

Buffalo Forge Co., Buffalo, N. Y.

Butterworth, H. W. & Sons Co.

Granger Foundry & Mch. Co.

Philadelphia Drying Machinery Co. (See ad. p. 14.)

Philadelphia Textile Machinery Co. (See ad. p. 15.)

Phillips, Thomas & Co., Providence, R. I.

Rusden Machine Co., Warren, R. I.

Sargent's, C. G. Sons, Graniteville, Mass. (See ad. p. 14.)

Sturtevant, B. F. Co., 34 Oliver St., Boston, Mass.

Dust Collectors.

Allington & Curtis Mfg. Co., 29 Otis St., East Cambridge, Mass.

Buffalo Forge Co., Buffalo, N. Y.

Philadelphia Textile Machinery Co., Hancock and Somerset Sts., Philadelphia, Pa. (See ad. p. 15.)

Sturtevant, B. F. Co., Boston, Mass.

Dusters.

See Wool and Waste Dusters.

Dyehouse Cans.

Hill, James Mfg. Co., Providence, R. I. (See ad. p. 33.)

Walrus Fibre Mfg. Co., Medford, Mass. (See ad. p. 38.)

Dyehouse Floors.

Warren Bros. Co., 113 Federal St., Boston.

Dyeing, Drying, Bleaching, and Finishing Machinery.

American Machine Works, 429 Library St., Phila., Pa.

Arlington Machine Works, Arlington Heights, Mass.

Birch Bros., Somerville, Mass. (See ad. p. 18.)

Buffalo Forge Co., Buffalo, N. Y.

Butterworth H. W. & Sons Co., Phila., Pa.

Curtis & Marble Machine Co., Worcester, Mass. (See ad. p. 18.)

A DIRECTORY OF
The Textile Establishments
IN THE UNITED STATES

Arranged by location, alphabetically under States, Cities and Towns, with maps showing the location of the Textile Mill Cities and Towns in the principal manufacturing States.

The following pages contain what we believe to be a complete directory of the cotton, woolen, knitting, silk, flax, and jute mills in the United States, as well as the dyeing and finishing works, bleacheries, print works, and other textile establishments.

The directory has been carefully compiled for 1900, during the past two months, by personal and mail canvass, and that our work has been thorough, manufacturers are aware by reason of mail inquiry or personal visits, and we take this opportunity to thank them for their courteous co-operation. Many establishments are enumerated which appear in no other directory, and its accuracy, we know by experience, surpasses *every other directory*. A well organized and experienced staff of office and travelling men, a wide acquaintance among mill men, and a carefully matured and well executed plan of work, enables us to do the work well and quickly.

The map feature is recognized as of great value and convenience. The plates were drawn and engraved especially for the TEXTILE WORLD, and are copyrighted. New plates of the New England States have been specially engraved for this edition, and all the maps have been corrected up to date.

The directory information is supplemented each month by the complete monthly record of new mills, enlargements, fires, changes, etc., published in each issue of the TEXTILE WORLD.

Each subscriber to the TEXTILE WORLD AND DIRECTORY, receives the best directory published, and in the TEXTILE WORLD a monthly supplement, giving all the new mills, changes, etc.

§ 5.—The separate lists of WORSTED MANUFACTURERS, also the lists of WHOLESALE DEALERS in COTTON, WOOLEN RAGS and WOOL SCOURERS, are contained in no other publications.

REWARD!

To the person who shall *first* inform us of any cotton, woolen, knitting, silk, flax or jute mill, print works, dyeing (except job dyeing), bleaching or finishing establishment in the United States which was in operation in April, 1900, and which is erroneously omitted from this Directory, we will give \$1.00 in cash, or credit same on subscription account, as he may prefer, subject to the following conditions: —

Full and complete information concerning the mill must be sent. By that we mean the name of the company, where located, names of the officers, including superintendent, class of goods made, capacity in machinery, that is, number of spindles, cards, looms, etc., kind of power, whether a dyehouse or not, name of buyer and selling agents. *This information must be verified.* We are obliged to take these precautions because in some instances previously claims for rewards have been made and paid, which subsequent investigation proved were unwarranted.

We shall also be pleased to learn of any mills which are included in this Directory which should *not* be there owing to failure, going out of business, fire or otherwise. We reserve the right to set our own basis of compensation for this class of information.

In recognizing claims for reward, we can only consider them with reference to the circumstances in April, 1900, as it is manifestly impossible to include mills which may have started subsequent to date of publication.

We especially invite the co-operation of travelling salesmen in the correction of any errors that they may discover.

No other Directory publishers have yet dared to offer a reward for the discovery of inaccuracies.

GUILD & LORD, PUBLISHERS.

EXPLANATION OF MAPS.

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, showing the location of the textile mill cities and towns. These maps are engraved especially for the **TEXTILE WORLD DIRECTORY**, and are arranged with special reference to the convenience of those desiring to reach the textile establishments. The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading and at top of right hand pages reference is made to the page of map for that State. The city of Philadelphia being the principal textile centre of the country, is shown by a series of six different maps, covering the manufacturing districts of that vicinity.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J. — "Passaic, D-9;" meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given, and the distance from it.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated, and railroad fares estimated on computation of about $2\frac{1}{2}$ cents per mile in the Eastern States, and 3 to 4 cents in Southern and Central States, for local travel.

The classification of the following section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

Under each city or town are grouped *all* the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

EXPLANATION OF ABBREVIATIONS.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows: —

C means cotton mill.

W means woolen mill.

S means silk mill.

J means jute mill.

K means knitting mill.

D means dyeing establishment.

Bl means bleachery.

F means finishing works,

Pr means print works.

Fl means flax mill.

These abbreviations are placed at right of column, so as to avoid confusion.

POWER. The kind of power is designated — steam or water.

DYE. If the mill has dyeing facilities, the word "dye" is used.

S. AGTS. means selling agents. The other abbreviations will be easily understood.

BUYER. In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.

LATE ADDITIONS AND CORRECTIONS

received too late for classification will be found by reference to the Table of Contents.

ALABAMA.

See map on page 68.

For explanation of abbreviations see page 66.

Alabama City. D.S. 2 1/2 miles from Gadsden.

DWIGHT MFG. CO.; Alabama Mills; R. A. (C) Mitchell, agent; C. H. Moody, supt.; Three and Four-yard Sheetings, Osanburgs and Drills; 60,000 ring spindles; 1600 looms; steam; Minot, Hooper & Co. s. agts.; agent and supt., buyers. See also Chicopee, Mass.

PHILADELPHIA AND SUBURBS.

See maps on pages 198, 200, 202, 204, 206, 208.

Pennsylvania, outside of Philadelphia and Suburbs, is classified separately and follows Philadelphia.

Under the general head of Philadelphia are included all textile establishments, not only in the city proper, but in the local districts of Manayunk, Frankford, Kensington, Germantown, Bridesburg, West Philadelphia, Port Richmond, and Nicetown.

These establishments are arranged in alphabetical order, regardless of location or kinds of goods made. The street address is given and the district mentioned. When possible, the approximate location of each mill is determined by designating the map and square in which it is located.

Map A is a "skeleton map" showing the general location of the different mill districts, some of the principal streets and avenues, and railroads. It gives a general idea of the city, without attempting to show the streets. This map is the basis of the enlarged sectional maps which follow. Certain squares, embracing the most populous mill districts, have been enlarged in maps B, C, D, E, and F. These maps do not cover the whole city, but they do cover the majority of the mills. There are, however, quite a number of mills outside the sections embraced in the maps, and these mills have no map and square number.

Map B shows the principal down town business section.

Map C shows the Kensington and Richmond districts.

Map D shows a large part of Germantown.

Map E shows Frankford and vicinity.

Map F shows Manayunk, Fall of Schuylkill, etc.

The Abbreviations used are the same as in other parts of the directory.

The Directory of Philadelphia and suburbs has been compiled especially for the **TEXTILE WORLD**, by thorough personal canvass. The Publishers will esteem it a favor to be informed of any inaccuracies that may be discovered, or of any changes that may occur after publication.

ACHUFF, SAMUEL; Achuff Knitting Mills; **K** Kensington Ave. and Huntingdon St; Map C, Sq. 62; Ribbed Underwear; 18 knitting machines; 36 sewing machines; sell direct; Bateson & Dowd, s. agts.

Hello!

I Can Save You Money!

I INSTALL PRIVATE MILL TELEPHONE SYSTEMS.

Have put in lots of them. You may not appreciate the need now, but mills which have them, wonder how they ever got along before. No rental, royalty or expert attention. No infringement. Not nearly so expensive as you may think.

I use the Ericsson Swedish Telephones;
the Best in the World.

F. O. PLUMMER,

620 Atlantic Ave., BOSTON, MASS.

A. J. Beckley & Co.

Garwood, New Jersey.

PERFORATED COPPER

For Wool Scouring,
Renser Boxes,
Dyeing of Raw Cotton,
Duster Screens,
Picker Screens.

Perforated Screens
of all kinds....

Reduces Insurance.

Latest. Simplest. Best.

THE WAGGONER WATCHMAN CLOCK

Gives a **printed record** on the **back** of the **dial** of the watchman's movements. The record cannot be seen, the **dial cannot be stopped**, or the clock manipulated by the watchman.

The watchman's **ALARM** and **FIRE** alarm are important additional features.

You throw aside good tools for new types that do more work—why not do the same with an "out-of-date" type of watchman clock and get the **best protection yet offered**.

Endorsed by the Insurance Bureaus.

The Waggoner Watchman Clock Co.,
GRAND RAPIDS, MICH., U. S. A.

ECO Magneto Watchman's ELECTRIC CLOCK

This Clock can not be tampered with, and is guaranteed for five years.

Special Bramwell Feeds for Wool Cards, Worsted Cards and Shoddy Cards. No manufacturer can afford to feed by hand. Send for references to GEORGE S. HARWOOD & SON, Boston. See page 20.

HATHAWAY BUILDING,

620 ATLANTIC AVENUE. BOSTON.

The Heart of the Wool Trade. The Centre of the Wool Trade in Boston, the Leading Wool Market of the Country.

The Wool, Wholesale Dry Goods and Machinery Districts of Boston.

From the accompanying map, which shows the wool, dry goods and machinery districts in the city of Boston, the central location of the **Hathaway Building** will be noted. It is directly across the street from the new **Southern Union Station**, 5 minutes walk from the Postoffice, along Federal St., 5 minutes walk from Washington St. via Summer, 15 minutes walk from the North Union Station. Electric cars to all parts of city and suburbs pass the door, and a station of the new elevated road will be opposite.

Centering about Chauncy and Franklin Sts., is the wholesale dry goods districts, within 5 minutes walk, while on Atlantic Ave., Federal, Purchase, High, Summer and Congress Sts., **the leading wool market of the country** is located. The cotton brokers centre about Postoffice Square, Kilby and State Sts., 7 minutes walk. The machinery and dyestuff dealers are mostly to be found along Pearl, Congress and Oliver Sts., within 5 minutes walk, thus the claim can justly be made that **the HATHAWAY BUILDING is the textile centre**.

The building itself is the business home for a large number of concerns in the textile line, a partial list of whom we give below.

American Woolen Co.,	Shoddy and Waste Dept.	Plummer, F. O.,	Mill Telephones.
Anthony & Kenyon,	Wool.	Reis & Co.,	Wool.
Berryman, R.,	"	Rice, E. E. & Co.,	Dyestuffs.
Boyce & Paige,	"	Rosenberg's, Jacob, Sons,	Wool.
Brown, Walter & Co.,	"	Ross, A. & Co.,	"
Brown, Wm.,	"	Ross, John & Son,	"
Cameron, A. J. & Co.,	Yarns and Tops.	Sayles, W. E.,	"
Carden, John,	Wool.	Smith, Henry F.,	"
Carleton, E. B. & Co.,	"	Solis & Co.,	Tops and Yarns.
Coffin & Dodd,	"	Swift Co.,	Wool.
Daly, James E.,	Wool Extracts and Shoddy.	TEXTILE WORLD.	
Dunbar & Ellis,	Textile Engravers.	Traugott, Schmidt & Co.,	"
Eco Magneto Clock Co.		Tuckerman & Graves,	"
Feinberg, M.,	Wool.	Von Burnuth, Fritz, Jr.,	"
Forino Co.,	"	Wall, Wm. E.,	"
Harding, Louis B.,	"	Watson, Herbert J.,	"
Harris, W. H.,	"	Wheelock, J. H. & Co.,	"
Hartley, F.,	"	Williams, Chas. C.,	"
Hartley, H.,	"	Wolf, W. & Sons,	"
Hawley, R. B., Jr.,	"	Wood, Jacob & H. & Co.,	"
Ley, C. Staadt & Co.,	"	Wright, John G.,	"
Perkins, F. Nathaniel,	"		

The building is well suited for Boston offices of out of town concerns. Inquiries may be addressed to C. W. Whittier & Bro., Agents, 209 Washington Street, Boston.

Cotton Waste.

Contracts made with Cotton and Knitting Mills for their yearly production of Waste.

THE "SIMPLEX" TABLES.

Everyone connected with the management of mills knows of the great amount of time consumed in frequent calculations. The same problems are frequently coming up for solution, requiring much valuable time in repeating the same calculations.

We have compiled these "Simplex" tables to save much of this labor, and give mill workers a quick and ready method of solving many of the problems constantly arising in mill work.

They have been carefully compiled, and have a range which will cover most woolen and worsted fabrics. We believe them to be an improvement over any yet published, and commend them to the trade believing they will prove to be labor savers.

COMPARATIVE YARN TABLES.

Cotton, woolen, worsted and linen each have their peculiar system for numbering yarn based on a given number of yards per pound. These different systems are a cause of confusion, especially in mills using yarn of two or more systems of numbering. This table has the different standards used in the United States, so arranged that the equivalent of the sizes by the different standards may be found on the same line, and readily compared.

The knitting mills usually employ the weight in grains of $6\frac{1}{2}$, $12\frac{1}{2}$, 25 or 50 yards as their standards, and these systems have been included.

The Basis of the Different Systems is as follows:

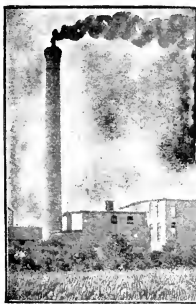

1 Run woolen (U. S.)	equals	1600 yards per lb. of 16 oz. (7000 grains).
1 Cut woolen (U. S.)	equals	300 yards per lb. of 16 oz. (7000 grains).
No. 1 worsted (Bradford count)	equals	560 yards per lb. of 16 oz. (7000 grains).
No. 1 worsted (International count)	equals	1000 metres per kilogramme.
No. 1 Cotton	equals	840 yards per lb. of 16 oz. (7000 grains).
No. 1 Spun Silk	equals	840 yards per lb. of 16 oz. (7000 grains).
No. 1 Linen	equals	300 yards per lb. of 16 oz. (7000 grains).
A knot (woolen)	is	80 yards single yarn.
A knot or lea (worsted)	is	80 " " "
A hank (worsted)	is	560 " " "
A skein or lea (cotton)	is	120 " " "
A hank (cotton)	is	840 " " "
A lea (linen)	is	300 " " "

AMERICAN, EGYPTIAN, STAINED EGYPTIAN,
CONES, COPS OR SKEINS.

BLEACHING AND DYEING IN ROLL OR PIECE.

THE "SIMPLEX" REED TABLES.

EXPLANATION.

The heavy figures at left of table are the number of threads in the warp; the threads per inch are at the top of each column. (For explanation of threads per inch see special table at end of Reed Tables.)

The width of a warp in the loom can be found opposite the number of threads in the warp and under the number of threads per inch in the reed.

Example: 2200 ends in the warp, No. 7 reed, 4 ends per dent. Opposite 2200 in the left hand column of table and under the column having 28 at the top, we find 28½, the width in inches in the loom.

The arrangement of this table makes it very convenient in laying out new fabrics and altering old ones, as the different widths, resulting from reeding a given number of ends with different numbers of threads per inch, are found on one line; and the different widths resulting from any change in the number of threads in the warp, are to be found in one column.

REED TABLE.

ENDS PER INCH AND THREADS IN DENT.

The following table shows the number of threads per inch obtained by the use of different reeds and different numbers of threads in a dent. In the first column will be found the number of threads per inch, and opposite are the various combinations. For instance, 32 threads per inch can be obtained by using a 16 reed, with two threads per dent, or an 8 reed, with four threads per dent.

Explanation of the Tables

(On following pages.)

For Finding the WEIGHT OF YARN per Yard of Cloth.

These tables show the weight of different lengths of yarn of various sizes, and will save many long calculations of the weight of different fabrics per yard.

At top of each column is given the size of yarn by cut, worsted hank or woolen run system.

In left-hand column is the length of yarn, and the figures in small type indicate weight of these various lengths in the different sizes of yarn. Suppose the fabric has 3600 yards of 2/30 worsted warp per yard of cloth, and 3500 yards 2/32 worsted filling per yard of cloth. Opposite 3600 in left-hand column, and under No. 15 worsted (2/30) at top of table, we find $6\frac{9}{10}$ ozs. as the weight of warp per yard. Opposite 3500 and under No. 16 worsted (2/32) we find $6\frac{3}{16}$ ozs. as weight of filling per yard, and the two weights combined give $13\frac{1}{10}$ as loom weight of goods.

Rule to find Number of Yards of Yarn per Woven Yard of Cloth :

For warp add to the number of threads on the warp an allowance for take up in weaving. This allowance varies from 5 per cent. to 10 per cent. in regular woolen and worsted fabrics.

For filling multiply width in loom in inches by number of picks per inch and add 5 per cent. to this product.

Example: Fabric has 3000 ends in warp, 70 inches wide in loom. Woven with 50 picks.

$$3000 + 10\% = 3300 \text{ yards warp yarn per yard of cloth.}$$

$$70 \times 50 = 3500 + 5\% = 3675 \text{ yards filling yarn per yard of cloth.}$$

JOHN C. HOLMES CO.,

SPRINGFIELD, VT.

COTTON WARPS,

Plain, Dyed and Bleached. Custom Work Solicited.

Chain Warp Dyeing.

SPECIALTY OF BLACKS FAST TO FULLING.

LINEN YARN IMPORTER,

Hughes Fawcett, 115 Franklin Street, New York.

FLAX, HEMP and JUTE LINE and TOW YARNS,

Linen Jacquard Harness Twines. For Cotton Harness and Heddle Twines.

For Cotton, Silk, Woolen and Carpet Manufacturers. Correspondence solicited. Samples promptly furnished.

FLEMING & CHAPIN,

Cotton and Worsted Braids Cotton and Silk Tapes Cotton Warps, Etc. Yarns Threads

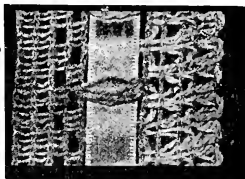

Use the Genuine Patented

Crochet Lace Edgings AND
Botany Worsted Facings.

Spun Silk Braids and Yarns a Specialty.

The Best Splicing Yarns
in all Numbers,

229 - Church St., - 231
PHILADELPHIA, PA.

KROUT & FITE MAN'F'G CO.,

Manufacturers of SILK and COTTON

Narrow Fabrics.

SPOOL TAPES A SPECIALTY.

Alleghany Avenue and Emerald Street, - - PHILADELPHIA, PA.
Long Distance Telephone.

CELEBRATED PYRAMID BRAND

LACINGS

For Underwear, Overshirts and Sweaters.

JOHN CATHCART & CO., - 155 Franklin St.,
NEW YORK.

SPUN SILK

AND

Schappe Yarns,

Also Linen, Jute and Ramie Yarns.

H. DE VEER,

Wool Exchange Bldg. New York.

Sullivan Machinery Co.,

100 Main St., - Claremont, N. H.

Chicago Office: 60 No. Clinton St.

Manufacturers of

Hand Power Baling Presses,

For Baling Cotton, Waste, Paper Stock, Rags,
Card Board, Soft Metals, Etc.

These presses make neat firm bales, are well made and durable, and are sold at moderate prices. Sullivan Presses are largely used by the cotton and paper mills and by stock dealers. Write us for circulars and prices.

RICHARD CAMPION,

SELLING AGENT FOR

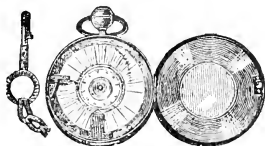

Bristol Worsted Mills,
Highland Worsted Mills.

17 BANK STREET,

PHILADELPHIA, - PA.

HAHN'S LATEST IMPROVED

Watchman's Time Detector.

In use wherever Watchmen are employed. Gives an exact record of the Watchman's doings. Also

Latest Improved Time Recorder

FOR KEEPING TIME OF EMPLOYEES.

Write for particulars and prices to

T. NANTZ & CO., 127 Duane St., N. Y.

KNITTING MACHINE GAUGE.

FLAT MACHINES.

In measuring flat machines, the measurement should be taken from centre to centre of the outside needles; count the needles and divide by the number of inches, thus giving the number of needles to the inch. In this method, however, it would be wrong to count both outside needles, as the extreme at one end would be the beginning of another measurement. The most practical way of counting would be to place your rule against the inside of one needle and count the other extreme in the measurement, thus making the number of needles and the number of spaces even, and obtaining the correct number within the measurement.

CIRCULAR MACHINES.

In measuring circular machines of any kind, always measure from the points at which the stitches are formed; thus, in obtaining the diameter of a circular machine of any kind with upright needles, measure from back to back of the needles, as that is where the work hangs and where the stitch is formed. In getting the diameter of Loopers or Seaming machines, measure from outside to outside of the brass through which the points project, this being the point of suspension of the work. To find the circumference from the diameter: multiply the diameter by $3 \frac{1}{7}$ or 3.14, thus reducing the circle to a straight line. To illustrate: Suppose the diameter of a machine is 10 inches, multiply 10 by 3.14 giving 31.4. Suppose there are 314 needles in the machine, divide 314 (the number of needles) by 31.4 (the number of inches in the needle line or circumference of the machine) and find that there are 10 needles to the inch.

Following is a small table of diameters and circumferences.

Dia.	Cir.	Dia.	Cir.	Dia.	Cir.
1.....	3.1416	9.....	28.274	17.....	53.407
2.....	6.2823	10.....	31.416	18.....	56.549
3.....	9.4248	11.....	34.558	19.....	59.69
4.....	12.566	12.....	37.699	20.....	62.832
5.....	15.708	13.....	40.841	21.....	65.973
6.....	18.850	14.....	43.982	22.....	69.115
7.....	21.991	15.....	47.124	23.....	72.257
8.....	25.133	16.....	50.265	24.....	75.398

RULE.—Divide the number of needles by the circumference or length in inches to find the gauge. Multiply the number of needles per inch as gauge by the number of inches in needle line to find the number of needles in head, cylinder or machine.

HOSIERY NEEDLE WIRE.

Needle wire varies some in the standard sizes by best makers, but the following are the nearest sizes in Stubbs' gauge and micrometer.

Stubbs' Gauge.	Fraction of an Inch.	Stubbs' Gauge.	Fraction of an Inch.	Stubbs' Gauge.	Fraction of an Inch.
23½.....	.0245	21½.....	.030—	19½.....	.039—
23.....	.026—	21.....	.0315	19.....	.0415
22½.....	.0275+	20½.....	.033+	18½.....	.044+
22.....	.029—	20.....	.0355	18.....	.0475

These figures and the following ones on spring needles are given from actual measurements by one of the standard needle makers of this country.

SPRING NEEDLE MACHINE GAUGE.

In Cylinder Knitting Machines as made in Cohoes and Troy, the needles are cast in metal, two in a block, and the gauge is known by the number of blocks or leads in three inches.

To reduce the gauge to inches multiply by $\frac{2}{3}$, for the gauge is number of leads in three inches and there are two needles to a lead. This is exact for a flat leaded frame, but on a circular machine the gauge is made a trifle coarser owing to the curvature of the needle line, and moreover, coarser still by the custom some firms have of gauging on the needle and the lead (i. e. from the lead at one end of the three inches, to the needle at the other end), or by gauging on the needles entirely.

The regular sizes, however, are about as follows:—

30 gauge, 20 needles to inch	$\left\{ \begin{array}{l} 24 \\ 23\frac{1}{2} \end{array} \right.$	Stubbs' gauge wire	$\left\{ \begin{array}{l} .023 \text{ to} \\ .0245 \end{array} \right.$
24 " 16 " "	$\left\{ \begin{array}{l} 23 \\ 22\frac{1}{2} \end{array} \right.$	" " "	$\left\{ \begin{array}{l} .0255 \text{ to} \\ .0275 \end{array} \right.$
22 " 14 $\frac{2}{3}$ " "	22	" " "	.029—
20 " 13 $\frac{1}{3}$ " "	21	" " "	.0315
18 " 12 " "	20	" " "	.0355
16 " 10 $\frac{2}{3}$ " "	19 $\frac{1}{2}$	" " "	.039—
14 " 9 $\frac{1}{3}$ " "	19	" " "	.0415

In Philadelphia district the number of needles per inch is most used as the standard on spring needle machines, rather than the gauge.

HOSIERY FRAME GAUGE.

In knitting frames for full-fashioned underwear the gauge is known by the same rule as on cylinder shirt frames.

Thus, 24 gauge is 16 needles to the inch.

The needles, however, are made from heavier wire for same gauge, thus:—

36 gauge, 24 needles to inch	$\left\{ \begin{array}{l} 24 \text{ or} \\ 23\frac{1}{2} \end{array} \right.$	Stubbs' gauge wire	$\left\{ \begin{array}{l} .023 \\ .0245 \end{array} \right.$
30 " 20 " "	22	" " "	.029—
27 " 18 " "	21	" " "	.0315
24 " 16 " "	20	" " "	.0355
21 " 14 " "	19 $\frac{1}{2}$	" " "	.039
18 " 12 " "	19	" " "	.0415

In warp knitting frames, the gauge is known by the number of needles to the inch.

LOOPERS FOR HOSE AND HALF HOSE.

The following loopers should be used for looping hose and half hose made on Seamless Knitting Machines with the following number of needles, and ranging in size from 2 $\frac{1}{2}$ to 4 inches.

60 to 72 needles on	7-point looper.
72 " 84 " "	9 " "
84 " 96 " "	10 " "
96 " 108 " "	12 " "
108 " 120 " "	13 " "
120 " 132 " "	14 " "
132 " 144 " "	15 " "
144 " 160 " "	16 " "
160 " 172 " "	17 " "
172 " 196 " "	18 " "
196 " 208 " "	20 " "

The above loopers mentioned will correspond with the gauges of the knitting machines.

A variation of 6 to 8 grains in 50 yards may be made on any gauge, if too firm a rib is not desired, either on the light or heavy side of the weight given.

If it is desired to run more than one thread, multiply the number of the cotton yarn (in the middle table) by the number of threads it is desired to run. For example, No. 10 cotton is run on 24 gauge, single thread. If two is desired, No. 20; if three, No. 30; and so on for as many threads as it is desired to run. This rule does not apply to numbers marked "light side" or those marked "heavy side," as the yarn would be too light or too heavy for the gauge, if multiplied more than twice.

The gauges in the above table are the number of leads in three inches. These same tables may be used for plain goods. The idea of using a heavier or lighter yarn on ribbed machines is to make the rib look finer or coarser, as the case may be. For instance, it is possible to give the appearance of 16 gauge or 20 gauge on an 18 gauge machine by using heavier on lighter yarn.

Eddy & Street,
YARNS AND BRAIDS,
COTTON, WOOLEN, WORSTED, SPUN SILK.
PROVIDENCE, - R. I.

TABLE OF STANDARD SIZES FOR CUT UNDERWEAR.

SHIRTS.

Sizes 34 to 44 inclusive, are made on cylinders from 16 in. to 21 in., using 1 in. for each size. The size of cylinders for sleeves is 12 in., 13 in. and 14 in. for men's and women's.

LADIES' VESTS.

Size.	Girth.	Length.	Size.	Girth.	Length.
1.....	26	28	6.....	36	33
2.....	28	29	7.....	38	34
3.....	30	30	8.....	40	35
4.....	32	31	Extra.....	42	..
5.....	34	32	Extra.....	44	..

MEN'S SHIRTS.

Size.	Girth.	Length.	Size.	Girth.	Length.
1.....	34	29	4.....	40	32
2.....	36	30	5.....	42	33
3.....	38	31	6.....	44	34

It will be observed that there is an increase of length of one inch to each size. This is to allow for the crawl or shrinkage of the goods when on the wearer.

Size of sleeves for Men's Shirts: 34 and 30, 18 in.; 38 and 42, 19 in.; 40 and 44, 20 in.

MEN'S DRAWERS.

Size.	Girth.	Length of Leg Outside.	Length of Inside Seam.	Length of Back.	Length of Front.	Rise of Crotch from Seam.
1.....	30	38	29	12½	11½	2
2.....	32	39	30	13½	12	2
3.....	34	40	31	14	12½	2½
4.....	36	41	32	14½	13	2½
5.....	38	41	32½	15	13½	2½
6.....	40	42	33	15½	14	2½
7.....	42	43	33½	15½	14½	2½
8.....	44	43	33½	16	15	2½

Size No. 44 is generally called an extra size.

ly to special gun-metal fittings, and supported
with our improved clamp stays. All expansion
and contraction is taken care of.
No back pressure on Engine, nor oil in boiler pos-
sible.
Will heat feed-water instantaneously to 200° to 212°
Fahrenheit.
All coils tested to 600 pounds pressure. Cannot be
burst by feed pump.
All water in contact only with copper tubing.
Nothing to rust out.
No trouble from pumping hot water.
Guaranteed in every particular.
The most durable, effective and economical Heater
produced.*

THE AMERICAN STANDARD. DOUBLE COIL HEATER.

This heater is constructed with two distinct coils of copper tubing incased in steel shell, with separate inlets and outlets. One coil is used for heating the feed water for boiler use, the other for heating water for dyeing, bleaching and washing purposes.

A saving in fuel of 40 per cent. is often to be had by the use of this heater where large quantities of hot water is required for other purposes besides boiler feeding.

Pipe Coils and Bends made of Iron, Brass, or Copper Pipe or Tube.

 Powder Cans.**

Mill Boxes and Baskets
 of Every Description.

Trucks, Factory Cars,
 Trunks, Etc.

THE WALRUS ROVING CAN.

POINTS TO CONSIDER.

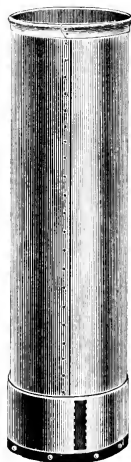

Solid, smooth, riveted seams.
 Top turned over steel wire.
 Improved kicking band, unexposed seam.
 Bottom edge protected by steel rim.
 Inside finish pure coach shellac.
 Outside finish pure varnish.
 Weight 1-2 lb. each diameter inch.

Our recent Improvements are rapidly claiming the attention of the best mills. Note how our steel clasp on kicking band makes an unexposed seam, prevents early destruction from constant kicking and other contact contingent to this part of the can.

Another important improvement which prolongs the life of the can is the steel rim on bottom edge. It positively prevents any contact of the fibre with floor, thus saving the edge from cutting, clipping or wearing. We claim that this feature nearly doubles the life of the can.

The fibre stock used in our can is beyond a question the best yet produced. It is of a springy nature rather than the stiff board like fibre. This gives it great resisting qualities.

Sample cans sent promptly on application.

ALPHABETICAL INDEX

—TO—

The Textile Establishments OF THE UNITED STATES.

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters; thus,

(C) means a cotton mill (K) means a knitting mill (B) means a bleachery
(W) means a woolen mill (F) means a flax mill (F) means finishing establishment
(S) means a silk mill (D) means a dye works (J) means a jute mill

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names; viz., proprietor's and company's name and also the name of the mill, as, for example, E. V. Pike, Sunnyside Mills, Cheltenham, Pa. In the alphabetical index this is listed as follows: Pike, E. V., Cheltenham, Pa., also under the head of Sunnyside Mills (E. V. Pike), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the Directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can readily be found through one or the other system of classification, viz., by its name in the alphabetical index or by its location in the body of the book, where full particulars about each mill will be found.

—Virginia, South Boston. Century (C Cotton Mills; \$100,000; T. S. Wilson, pres.; F. A. Lukin, treas.; Cotton Yarns; 5,000 spindles; steam. (Under construction.)

TEXTILE WORLD

AND
INDUSTRIAL RECORD

This is a handsome, illustrated monthly magazine of 180 to 200 pages, similar in size and general characteristics to the leading monthly magazines. It is the oldest textile journal in the world, (the Industrial Record was established in 1868; the Industrial Record and Textile World were consolidated in 1897.) It has the largest circulation among textile manufacturers. It is profusely illustrated. Each number contains as a frontispiece the portrait of some prominent manufacturer, with biographical sketch, which is a very interesting feature. Its departments are illustrated with engravings of machinery, and drawings and cuts to illustrate the text. It presents a monthly record of all that is latest and best in manufacturing processes, methods and machinery, and enables its readers to be thoroughly informed of progress made in the textile industry. It numbers among its contributors the leading authorities on textile subjects in this country and abroad.

Its Questions and Answers department answers free of charge any inquiry relating to textile matters, received from any subscriber to the TEXTILE WORLD. A wide range of information is given through this medium.

It has a thorough system of record of mill news, giving carefully classified information about all new mills, enlargements and improvements, and the general facts and gossip of the trade from month to month.

Its department of Personal Record is a very complete report of all changes and personal happenings among the mill men.

Its Employment Bureau assists subscribers who wish to secure positions as superintendents or overseers. Very careful attention is paid to this department.

Its Dyers' Supplement is a separate 16-page pamphlet, showing the actual dyed samples produced with the latest colors on the market.

It gives each month a list of all the textile patents issued, and illustrated descriptions of new machinery coming on the market.

It contains complete reviews of the raw material, yarn and dry goods markets. Its process departments are divided into Cotton Department, Woolen Department, Knitting Department, Power Department, Colors and Dyeing Department. Under these departments, experts in their different lines present the best information obtainable.

Special quarterly issues are published, in which emphasis is given to some particular department. January is a statistical issue, giving the annual report of new mill construction, and other important statistics of the year. April is a special cotton number, July a special knitting number, October a special woolen number.

Subscription Price, \$3.00 per year, including Directory.

" " \$2.00 " " without "

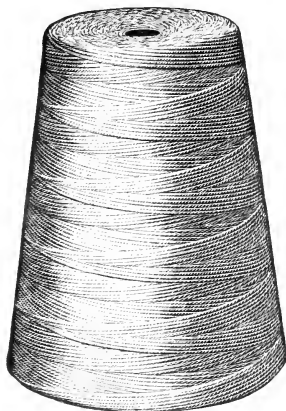

Dyers' Supplement, \$1.00 per year.

In Foreign Countries, \$4.00 per year.

620 ATLANTIC AVENUE,

- -

BOSTON.

Yarn wound on cones by the "UNIVERSAL" system delivers to knitting machines **WITHOUT REWINDING**, and with perfect uniformity.

No cobwebs on the end of cones and no waste of yarn.

The yarn is cleaned by the process of winding and knits a more uniform fabric.

UNIVERSAL WINDING CO.,

226 Devonshire Street,

BOSTON.

F. H. BISHOP, - General Manager.
